

TPC GROUP 14

Use Cases

UC-1 to UC-11

Client: SkillsTrack Training Centre

Project: Learner Support Portal

Programme: Technical Programming Cycle | September 2026

1. System

Learner Support Portal

2. Actors

Learner

The learner uses the portal to manage learning activities, tasks, goals, support sessions and progress.

Assessor / Administrator

The assessor uses the portal to monitor learner activity and manage learner support activities.

3. Learner use cases

We use UC to give each use case a unique ID.

UC-1 Register Account

Actor: Learner

Description: The learner creates an account to access the learner support portal.

Precondition: The learner does not already have an account.

Main Flow:

1. Learner opens the registration page.
2. Learner enters the required registration details.
3. System validates the information.
4. System creates the learner account.
5. System displays a successful registration message.
6. Learner can proceed to log in.

Alternative Flow

- If required information is missing or invalid, the system displays an error message.
- If the email address is already registered, the system informs the learner.

UC-2 Login

Actor: Learner / Assessor

Description: The user signs in to access the portal.

Precondition: The user has a registered account.

Main Flow:

1. User enters their login details.
2. System validates the details.
3. System authenticates the user.
4. System displays the appropriate dashboard (Learner Dashboard or Assessor Dashboard).

Alternative Flow

- If the login details are incorrect, the system displays an error message.

UC-3 Manage Learning Tasks

Actor: Learner

Description: The learner manages their learning tasks.

Main Flow:

1. Learner opens the task manager.
2. Learner creates, views or edits a task.
3. Learner can mark a task as completed.
4. Learner can delete a task.
5. System updates the task list.

Alternative Flow

- Before deleting a task, the system displays a confirmation message.
- If the learner cancels the deletion, the task remains unchanged.

UC-4 Manage Goals

Actor: Learner

Description: The learner records and manages learning goals.

Main Flow:

1. Learner opens the goals section.
2. Learner creates or updates a goal.
3. System saves the goal.
4. System displays the updated goal information.

UC-5 Book Support Session

Actor: Learner

Description: The learner submits a request for a support session.

Main Flow:

1. Learner opens the support-session section.
2. Learner enters the required booking information.
3. System validates the information.
4. System saves the booking request.
5. System displays the booking status.

Alternative Flow:

- If required information is missing or invalid, the system displays an error message.

UC-6 View Progress

Actor: Learner

Description: The learner views their learning progress.

Main Flow:

1. Learner opens the dashboard.
2. System retrieves the learner's task information.
3. System calculates the learner's progress.
4. System displays completed, outstanding and total tasks.
5. Learner can view their progress summary.

UC-7 Access Learning Resources

Actor: Learner

Description: The learner accesses learning materials available through the portal.

Main Flow:

1. Learner opens the learning resources section.
2. System displays available resources.
3. Learner selects a resource.
4. System displays or provides access to the selected resource.

UC-8 Play Coding Mini-Game

Actor: Learner

Description: The learner plays the coding mini-game as an interactive learning activity.

Main Flow:

1. Learner opens the mini-game.
2. System loads the game.
3. Learner interacts with the game.
4. System processes the learner's actions.
5. System displays the game result or score.

4. Assessor / Administrator Use Cases

UC-9 View Learner Activity and Progress

Actor: Assessor / Administrator

Description: The assessor views relevant learner activity and progress.

Main Flow:

1. Assessor logs into the portal.
2. Assessor accesses learner information.
3. System displays relevant learner tasks and progress.
4. Assessor reviews the information.

UC-10 Manage Support Bookings

Actor: Assessor / Administrator

Description: The assessor manages learner support-session bookings.

Main Flow:

1. Assessor opens support bookings.
2. System displays submitted bookings.
3. Assessor reviews a booking.
4. Assessor updates the booking status.
5. System saves the updated status.

UC-11 Upload Learning Materials

Actor: Assessor / Administrator

Description: The assessor uploads learning materials for learners to access.

Main Flow:

1. Assessor opens the learning-materials section.
2. Assessor selects the material to upload.
3. System validates the upload.
4. System stores the material.
5. The material becomes available to learners.
